# Mike DocuFormat

## Automated Formatting of Legal Documents

---

Mike DocuFormat is an AI-powered MS Word Add-in that captures and corrects all errors and inconsistencies in formatting in a legal document. It helps legal teams implement their house styles effectively and efficiently.

## What Does Mike DocuFormat Do?

### LINE SPACING

Each line is scanned individually and any spacing between them that is not in sync with the input setting is detected as an error.

### FORMATTING FOR HEADINGS

Set personalised heading styles in settings and fix all the headings in one click without spending time to correct each one.

### FIX PARAGRAPH STYLING

Set and correct paragraph styles with fonts and font size using settings. It also detects any inconsistency and reports them as error.

### STYLING FOR SCHEDULES

Get the freedom to format schedule that is different from the main agreement. Make your draft stand out from a standard legal document.

### FIX NUMBERING FORMAT

Get the flexibility to create your own unique type of numbering format. It detects any inconsistency and error in numbering and fixes them in one click, saving time and reducing stress.

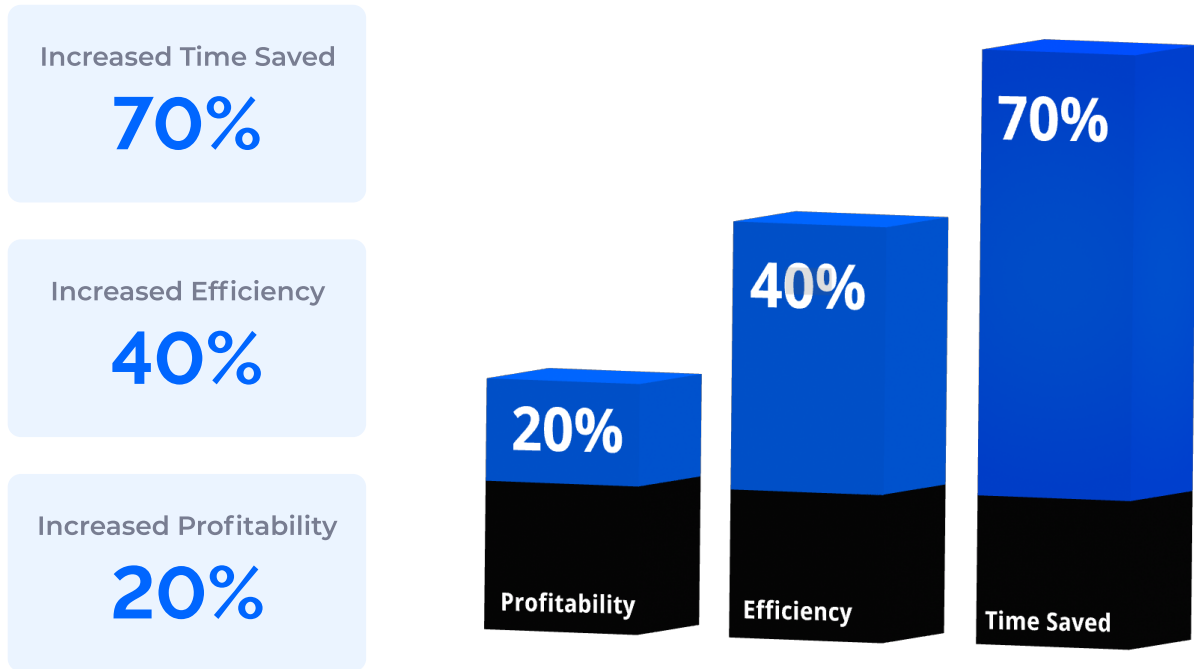

### SET YOUR OWN STYLES

Take full control of your templates and set your in-house font family, size, text format and style for heading, sub-heading, main agreement and schedule body.
